### Privacy Notice

For us to give you the help that you need and to keep you safe, we need to save and use some of your information. This includes:

Your name and address

Your school and things you like to do

Your doctor's details

Information about your health and wellbeing

Letters about you written by doctors and others

If it is helpful for your sessions, we might want to talk with some of your teachers, but we will only do this if your parents say it's ok!

If we are worried about you or someone else being safe, then we may speak to people who can help, such as your doctor. We will always try to speak to you first before we share any of your information.

But all of this information is kept private, and we will only speak to people who are involved in your care. If you want to see the files that are kept about you, you can speak to us about this.
